

ANTHONY GRUMBLATT

ILLUSTRATOR, GRAPHIC DESIGNER, ANIMATOR

PROFESSIONAL PROFILE

I'm an Illustrator that has spent the last 4 years learning and creating art in multiple mediums. I've been able to understand and work efficiently with multiple art programs along with many years of studying human anatomy to make the most well suited character designs for any type of stylization the project needs. Within those years of time a lot of my time has been spent creating pieces of work needed for different situations. Lessons from sports and other extracurricular activities has helped me become a well mannered person, becoming both strong and open minded. I hope to work in the animation industry as a character designer to create iconic characters that will be remembered by many.
